HS Wrocław renamed as UTC Aerospace Systems Wrocław

After few years of operation, HS Wrocław Sp. z o.o. has changed its name to UTC Aerospace Systems Wrocław Sp. z o.o. to reflect its synergy with the UTAS family of companies and leverage the power of the UTC brand to increase recognition in the aerospace industry.

HS Wrocław was founded over 60 years ago as PZL- Hydral and is known today in the aviation industry as an expert in the field of design, manufacturing, and service of key aviation systems:

- Hydraulic and pneumatic control systems
- Fuel control systems
- Details and sub-assemblies for aviation

The company was acquired by Hamilton Sundstrand in 2010 and implemented a modernization program, which transformed HS Wrocław into a world-class manufacturing entity. Investments in research and development culminated in the opening of a Global Engineering Center in 2014. In a spirit of continuous improvement, and to better serve its customers worldwide, HS Wrocław has expanded its repair and overhaul business and established an MRO site.

The company has begun to communicate its brand transition to customers, employees, local authorities, and government agencies. With its new name, UTC Aerospace Systems Wrocław is well positioned for continued success in the aerospace industry.
